PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable web applications and distributed systems. Proficient in Node.js, React, TypeScript, AWS, Docker, and microservices architecture. Experienced in designing REST APIs, CI/CD pipelines, cloud infrastructure, and performance optimization. Background in fintech and high-transaction systems with strong focus on reliability, scalability, and clean code practices.

EXPERIENCE

Backend Engineer & DevOps

Nov 2025 - Feb 2026

Raveum

Remote

- Architected end-to-end AWS infrastructure from scratch, migrating legacy JavaScript to TypeScript and orchestrating 5+ containerized services through automated CI/CD pipelines
- Slashed cloud costs by 60% through strategic optimization and automated backup implementation
- Delivered 99.9% uptime with production-grade deployment and load balancing across multiple services

Fullstack Engineer (SDE-2)

Jul 2023 - Sep 2025

Neokred Technologies

Bangalore, India

- Developed fintech data pipelines processing 30M+ records per client, accelerating processing time from 8 hours to under 1 hour while cutting costs by 70%
- Established money-movement systems handling \$50M+ monthly transactions with 99.5% reconciliation accuracy
- Designed backend APIs for 20+ banking partners, decreasing latency by 50% and supporting 1M+ monthly transactions

Software Engineer

Feb 2023 - Jul 2023

SIBIN Group

Sikkim, Gangtok

- Implemented secure APIs and authentication systems for enterprise applications serving 5,000+ users with zero security incidents
- Built modular frontend and backend components improving maintainability and accelerating bug resolution by 30%

SELECTED PROJECTS

Eleven11 — Smart IoT Platform

Mobile Application

- Launched cross-platform IoT control platform managing 1,000+ connected devices with 99% uptime and 50% faster device onboarding

Voice to Notion — AI Workflow Automation

AI Product

- Created AI-driven voice-to-structured-data system achieving 95% extraction accuracy and eliminating 80% of manual logging time

TECHNICAL SKILLS

Frontend: React, Next.js, Angular, React Native, Flutter

Backend: Node.js, TypeScript, Express, GraphQL, .NET, gRPC, Kafka, Golang

DevOps: AWS (EC2, ECS, ECR, ELB, S3, EBS, Amplify), Docker, Kubernetes, CI/CD

Databases: MongoDB, PostgreSQL, Redis, MySQL

Tools: Git, Agile, Jest, Stripe, Plaid

EDUCATION

Indira Gandhi National Open University (IGNOU)

Jan 2023

Bachelor of Computer Applications (BCA)

Gangtok, Sikkim

Tadong Senior Secondary School (TSSS)

Jan 2017 - Feb 2020

Higher Secondary Education (IT/Computer Science)

Gangtok, Sikkim
